⁽¹⁾ Calculated based on RMB loan volume.

⁽²⁾ We have developed our proprietary credit scoring and decision-making algorithms to efficiently process and consolidate all the data collected, and generate a credit score and grade for each borrower applicant. All borrowers on Hexindai's platform are graded with a credit score of A (High Creditworthiness) to D (High Risk). Grade B "Good" credit scores account for the largest percentage of Hexindai's loan transaction volumes and are given to borrowers with relatively high creditworthiness and stable income sources.

^{(3) &#}x27;All inclusive APR' refers to the rate that is charged to borrowers, including a nominal interest rate, a loan facilitation or management service fee, channel fee and premium, expressed as a single percentage number that represents the actual annualized cost of borrowing over the term of a loan. These all inclusive APRs represent the average annual percentage rates for each credit grade of borrowers during the specified period.

⁽⁴⁾ The average nominal interest rate paid to investors.

⁽⁵⁾ The gross billing ratio is calculated as the total loan facilitation fees or loan management fees that we charge borrowers for the entire life of the loan, divided by the total amount of principal. The average transaction fee rate presented in the table above is the average of the transaction fee rates for loans falling under the same pricing grade, but with different tenures and repayment schedules. As the interest rate and APR are both annualized rates while the average gross billing ratio is calculated as described above, the sum of the annual interest rate and the average gross billing ratio is not equal to the APR.

⁽⁶⁾ Fiscal year end is March 31.

⁽¹⁾ Hexindai's loyalty program for investors consists of seven VIP tiers that are based on the annualized outstanding investment amount and length of the lock-up period. Investors can upgrade VIP tiers by investing larger amounts with longer lock-up periods.

⁽²⁾ Repeat Investment rate refers to the number of new investors who invested for the first time to June 30, 2018, divided by the number of new investors who invested for the first time to our marketplace during the relevant loan issued period. New investors are those who never invested on our platform before a certain loan issued period.

M3+ Net Charge Off Rates For Credit Loan

	Total M	Total M3+Net Charge-Off Rate				
Loan issued period	as of December 31, 2017	as of March 31, 2018	as of June 30, 2018			
Since inception to March 31, 2016	3.09%	3.95%	4.79%			
From April 1, 2016 to March 31, 2017	1.37%	2.58%	3.38%			
From April 1, 2017 to March 31, 2018	0.03%	0.11%	0.30%			

We define "M3+ Net Charge-off Rates", with respect to loans facilitated during a specified time period or the "vintage", as

- (i) the total balance of outstanding principal of loans that become delinquent for over three months during a specified period and the remainder of the expected interest for the life of such loans, divided by
- (ii) the total initial principal of the loans facilitated in such vintage.

We define the delinquency rates as of the end of the period as the outstanding balance of principal and interest that were 15 to 29, 30 to 59, and 60 to 89 calendar days delinquent as a percentage of the total outstanding balance of principal and interest.

Insurance services fee prepaid to Changan Insurance equals to:

- Loan default risk premium: 2% of the loan principal and accrued interest; plus
- (ii) Service fee: 2% of the loan principal.
